**Research Articles**

H. Xu, D. Marc Kilgour and K.W. Hipel, An integrated algebraic approach to conflict resolution with three-level preference 693

N. L. Manev, Sequences generating permutations 708

Q.-L. Zhao and X.-Z. Wang, The integrable coupling system of a 3 x 3 discrete matrix spectral problem 720

L. Ronghua, P. Wankai and L. Ping-kei, Convergence of numerical solutions to stochastic age-structured population equations with diffusions and Markovian switching 744

F.-F. Zhang, Z. Jin and G.-Q. Sun, Bifurcation analysis of a delayed epidemic model 753

Y. Zhang, S. Xu, Y. Chu and J. Lu, Robust global synchronization of complex networks with neutral-type delayed nodes 768

K. Yadani, K. Kondo and M. Iwasaki, A singular value decomposition algorithm based on solving hyperplane constrained nonlinear systems 779

A. Dilck Gungör and K. C. Das, Improved upper and lower bounds for the spectral radius of digraphs 791

Z. Xiang and Q. Chen, Robust reliable control for uncertain switched nonlinear systems with time delay under asynchronous switching 800

P. Zhou and L. W. Fan, An extension to data envelopment analysis with preference structure for estimating overall inefficiency 812

X.-M. Zeng, D. Lin and L. Li, A note on approximation properties of q-Durrmeyer operators 819

Y. Yao, M. A. Noor and Y.-C. Liou, A new hybrid iterative algorithm for variational inequalities 822

Q.-K. Pan, P. N. Suganthan, M. F. Tasgetiren and J. J. Liang, A self-adaptive global best harmony search algorithm for continuous optimization problems 830

W. Youjun, Z. Yimin and S. Yuotian, Multiple solutions for quasilinear Schrödinger equations involving critical exponent 849

X.-M. Jia and L.-X. Hu, Global attractivity of a higher-order nonlinear difference equation 857

A. Plaza, S. Falcón and J. P. Suárez, On the non-degeneracy property of the longest-edge trisection of triangles 862

F. Li, Z. Li and L. Pi, Variable exponent functionals in image restoration 870

A. D. Gadjiev and A. M. Ghorbanalizadeh, Approximation properties of a new type Bernstein–Stancu polynomials of one and two variables 890

L.-L. Wang and Y.-H. Fan, Permanence and existence of periodic solutions for a generalized system with feedback control 902

(Continued on last page)
S.M. Ikhlaîr and R. Sâver, Approximate bound state solutions of Dirac equation with Hulthén potential including Coulomb-like tensor potential 911
S. Stevîç, Weighted composition operators from the logarithmic weighted-type space to the weighted Bergman space in $C$ 924
A.K. Bhunia, L. Sahoo and D. Roy, Reliability stochastic optimization for a series system with interval component reliability via genetic algorithm 929
L.-B. Liu and H.-W. Liu, Quartic spline methods for solving one-dimensional telegraphic equations 951
Q.-L. Dong, S. He and F. Su, Strong convergence of an iterative algorithm for an infinite family of strict pseudo-contractive in Banach spaces 959
S.S. Siddiqi and K. Rehan, Modified form of binary and ternary 3-point subdivision schemes 970
P. Keller and P. Woźny, On the convergence of the method for indefinite integration of oscillatory and singular functions 989
W. Cao, T-stability of the semi-implicit Euler method for delay differential equations with multiplicative noise 999

Technical Notes

W. Chu, Fibonacci polynomials and Sylvester determinant of tridiagonal matrix 1018
P.T. Nam and P.N. Pathirana, Improvement on delay dependent absolute stability of Lurie control systems with multiple time delays 1024
