SCIENCE IN INDIA

EDITORIAL
123 A nation with ambition
India should not suppress scientific dissent if it wants to succeed

144 India's science test
Despite making strides in some areas of R&D, the country has far to go

FEATURES
141 Science in India
The enormous potential — and the huge challenges

142 India by the numbers
The highs and lows of the nation's science base

148 The anti-bureaucrat
K. VijayRaghavan wants to free the biological sciences from red tape

NEWS
138 India relaxes position on field trials of
GM crops

COMMENT
151 Priorities for science in India
Ten research leaders set out their visions for the future

156 Rethink India's energy strategy
Arunabha Ghosh & Karthik Ganesan
Poor and rural households must be taken into account

THIS WEEK

EDITORIALS
125 ANIMAL RESEARCH
Challenging times
Attempts to halt animal experiments in Europe are rightly facing failure

126 DATA
Polls apart
The abrupt failure of opinion polls in the UK election holds lessons for science

WORLD VIEW
127 Regulate gene editing in wild animals
Joanline Lurieol
Modification of wild species cannot be allowed to damage ecosystems

RESEARCH HIGHLIGHTS
128 SELECTIONS FROM THE SCIENTIFIC LITERATURE
Cancer link to gut biofilms / The early bird / Shuttle chemistry / C elegans genome

SEVEN DAYS
130 THE NEWS IN BRIEF
Libya free of Ebola / UAE plans Mars mission / Monsanto makes bid for Syngenta / SpaceX escape pod passes test

BOOKS & ARTS
158 AUTOBIOGRAPHY
In search of self and science
Tim Radford

139 SCIENCE FICTION
After the cataclysm
John Gribbin

140 NEUROPHYSIOLOGY
The man who bared the brain
Adele Abbott

CORRESPONDENCE
151 Embedding social science in climate policy
The importance of plant identification / Citizen science can only do so much / Publish and be famous

NEWS IN FOCUS

133 EARTH SCIENCE
Researchers rush to map landslide risk in Nepal

134 POLITICS
UK election results have implications for science

135 PHYSICS
Cloud of antimatter found in thunderstorm

136 GENOMICS
Analysis of human microbiome raises privacy concerns

137 PUBLIC HEALTH
Ebola failures prompt WHO to rethink emergency response

CAREERS

247 ADJUNCT TEACHING
For love of the lecture
Expected frustrations and little pay when taking up contract teaching

NATUREJOBS ADVERTISING FEATURE
Spotlight on Wuhan

FUTURES
252 When last I saw the stars
Jeff Hecht
Eukaryote-like archaea

Hydrothermal vent microbes with eukaryote-like complexity hint at a line of succession.

LETTERS
192 ASTROPHYSICS Strangulation as the primary mechanism for shutting down star formation in galaxies
Y Peng, P Marisola & P Cochrane

195 SUPERCONDUCTORS Electron pairing without superconductivity
G Cheng et al.

200 QUANTUM PHYSICS Quantum coherent optical phase modulation in an ultrafast transmission electron microscope
A Feitl et al.

204 BIOGEOCHEMISTRY Global carbon export from the terrestrial biosphere controlled by erosion
V Saly, B Poulter, Ehrntsirk & T Elgin

209 ENVIRONMENTAL MICROBIOLOGY Multiomics of permafrost, active layer and thermokarst bog soil microbiomes
J Aultman et al.

213 PLANT SCIENCES Pathogen-secreted proteases activate a novel plant immune pathway
Z Cheng et al.

217 DEVELOPMENTAL BIOLOGY YAP is essential for tissue tension to ensure vertebrate 3D body shape
S Parniak et al.

222 AUTOIMMUNE DISEASES Clinical improvement in psoriasis with specific targeting of interleukin-23
T Kopp et al.

227 MOLECULAR BIOLOGY Nuclear architecture dictates HIV-1 integration site selection
B Martin et al.

232 MOLECULAR BIOLOGY The Xist IncRNA interacts directly with SHARP to silence transcription through HDAC3
C A McGhee et al.

237 STRUCTURAL BIOLOGY Horizontal membrane intrinsic α-helices in the stator α-subunit of an F-type ATP synthase
M Affek et al.

241 STRUCTURAL BIOLOGY Electron cryomicroscopy observation of rotational states in a eukaryotic V-ATPase
J Zhao, S Bhakkar & J L Rubinstein

246 ERRATUM Entanglement with negative Wigner function of almost 3,000 atoms heralded by one photon
R McConnell, H Zhang, J Hu, S Cuk & V Vuletic

A YAP for that

From flattened fish to humans, the transcriptional coactivator YAP has a big say in body shape.

ARTICLES
173 EVOLUTION Complex archaea that bridge the gap between prokaryotes and eukaryotes
A Spang et al.

180 NEUROSCIENCE Neurons for hunger and thirst transmit a negative-valence teaching signal
J N Betley et al.

185 NEUROSCIENCE Neural dynamics for landmark orientation and angular path integration
J D Seelig & V Jayaraman
