20 Learning Control in Robotics
Trajectory-based optimal control techniques
By Stefan Schaal and Christopher G. Atkeson

30 Learning Actions from Observations
Primitive-based modeling and grammar
By Volker Krüger, Dennis L. Herzog, Sanmohan Babu, Aleš Udles, and Danica Krige

44 Learning and Reproduction of Gestures by Imitation
An approach based on hidden Markov model and Gaussian mixture regression
By Sylvain Calinon, Florent Dahan, Eric L. Sauser, Danilo G. Caldwell, and Audu G. Billard

55 Imitation and Reinforcement Learning
Practical algorithms for motor primitives in robotics
By Jens Kohler and Jan Peters

63 A Mine on Its Own
Fully autonomous, remotely operated mine
By Subhajit Vandevoort, Fabio Ramos, Eric Nettleton, and Hugh Durrant-Whyte

74 Learning for Autonomous Navigation
Advances in machine learning for rough terrain mobility
By James Andrew Bagwell, David Bradley, David Silver, Boris Sofman, and Anthony Stentz

85 Human–Robot Interaction
An exclusive course for computer scientists and engineers
By Robin R. Murphy, Tatsuya Nomura, Audu Billard, and Jennifer L. Burke

90 Guided Chaos
Path planning and control for a UAV-forced landing
By Pillar Eng, Luis Mejias, Rodney Walker, and Daniel Fitzgerald
