SPECIAL SECTION ON WIRELESS TECHNOLOGY: MODELS, DESIGNS, AND APPLICATIONS
Guest Editorial ................................................................. E. K.-N. Yung and F. F. Dai 1502

SPECIAL SECTION PAPERS
Effects of LO Phase and Amplitude Imbalances and Phase Noise on M-QAM Transceiver Performance .............................................. Z. Chen and F. F. Dai 1505
A Node-to-Node Location Verification Method ........................................ D. Liu, M.-C. Lee, and D. Wu 1526
Data-Aided Timing Synchronization for FM-DCSK UWB Communication Systems ...................................................... S. Chen, L. Wang, and G. Chen 1538
A 52-mW 3.1–10.6-GHz Fully Integrated Correlator for IR-UWB Transceivers in 0.18-μm CMOS .......................................................... H. Xie, X. Wang, L. Lin, H. Tang, Q. Fang, H. Zhao, S. Wang, F. Yao, A. Wang, Y. Zhou, and B. Qin 1546
A CMOS Transceiver for a Multistandard 13.56-MHz RFID Reader SoC .................................................................................. Y.-H. Kim, Y.-C. Choi, M.-W. Seo, S.-S. Yoo, and H.-J. Yoo 1563
Hardware Implementation of RFID Mutual Authentication Protocol .................................................................................. Y.-J. Huang, C.-C. Yim, M.-K. Chen, W.-C. Lin, and H.-C. Teng 1573
A Low-Cost Printed CP Patch Antenna for RFID Smart Bookshelf in Library .................................................................................. P.-Y. Lai, K. K.-O. Yang, and E. K.-N. Yung 1583

PAPERS
Multiphase Systems
Machines and Drives

(Contents Continued on Page 1501)
Single-Phase Electronics

Integrated Magnetic Self-Driven ZVS Nonisolated Full-Bridge Converter

R. Jin, Y. Sun, M. Xu, D. Sterk, and F. C. Lee 1615

A Review of Switch-Mode Sustain Drivers With Resonant Networks for Plasma Display Panels

S. Kwak 1624

Single-Side Sustaining Technique for Plasma Display Panel Using Dual-Resonant Method

J.-Y. Lee, J.-W. Kang, and Y.-S. Jeong 1635

Zero-Voltage and Zero-Current-Switching PWM Combined Three-Level DC/DC Converter

F. Liu, J. Yan, and X. Ruan 1644

Electric Dynamic Modeling of HID Lamps for Electronic Ballast Design

R. Osorio-Sanchez, N. Velez, C. Hernandez, E. Rodriguez, S. Pinto, and M. Jader 1655

Magnetic Component Model for Planar Structures Based on Transmission Lines

R. Prieto, J. A. Olvera, J. A. Cobos, and M. Christini 1663

Digital Average Current-Mode Control of PWM DC-DC Converters Without Current Sensors

Y. Qiu, H. Liu, and X. Chen 1670

Renewable Energy Systems

Soft-Switching Converter With HF Transformer for Grid-Connected Photovoltaic Systems

M. Cacciato, A. Consoli, R. Aranazio, and F. Gennaro 1678

Robotics and Mechatronics

Multifunctional Intelligent Autonomous Parking Controllers for Carlike Mobile Robots

T.-H. S. Li, Y.-C. Yeh, J.-D. Wu, M.-Y. Hsiao, and C.-Y. Chen 1687

ZMP-Based Online Jumping Pattern Generation for a One-Legged Robot

B. Ugurlu and A. Kawamura 1701

Control and Signal Processing

Seeker Optimization Algorithm for Digital IIR Filter Design

C. Dai, W. Chen, and Y. Zhu 1710

Voltage-Boosting Converter Based on Charge Pump and Coupling Inductor With Passive Voltage Clamping

K. I. Hyun and Y. T. You 1719

Linearizing the Output Characteristic of GMR Current Sensors Through Hysteresis Modeling

I. Jedlicska, R. Weiss, and R. Weigel 1728

A Hard-Disk-Drive Servo System Design Using Composite Nonlinear-Feedback Control With Optimal Nonlinear Gain Tuning Methods

W. Lai, C. K. Tsun, and B. M. Chen 1735

Coordinated Adaptive Robust Contouring Control of an Industrial Biaxial Precision Gantry With Cogging Force Compensations

C. Hu, B. Yao, and Q. Wang 1746

Diagnosis and Monitoring

A Wavelet-Based Approach to Internal Seal Damage Diagnosis in Hydraulic Actuators

A. Yazdanpanah Goharzadeh and N. Sepahi 1755

Instrumentation and Sensors

A 2.4-GHz CMOS Short-Range Wireless-Sensor-Network Interface for Automotive Applications

J. P. Carmona, P. M. Mendo, C. Couto, and J. H. Correia 1764

Implementation of a Transformerless Common-Mode Active Filter for Online Converter Systems

M. L. Heldwein, H. Enrl, J. Biela, and J. W. Kolar 1772

A Kalman/Particle Filter-Based Position and Orientation Estimation Method Using a Sensor/Inertial Measurement Unit Hybrid System

S. P. Won, W. W. Melek, and F. Goharzadeh 1873

Embedded Systems

Multilayer Image Processing for Multiscale Harris Corner Detection in Digital Realization

P.-Y. Hsiao, C.-L. Lu, and L.-C. Fu 1799

Rapid Prototyping of Graphical User Interfaces for Petri-Net-Based Controllers

L. Gomes and J. Laurencio 1806

Intelligent Systems

The Design and Implementation of a Wheeled Inverted Pendulum Using an Adaptive Output Recurrent Cerebellar Model Articulation Controller

C.-H. Chiu 1814

A Neural Network Multiagent Architecture Applied to Industrial Networks for Dynamic Allocation of Control Strategies Using Standard Function Blocks

V. Machado, A. D. D. Neto, and J. D. de Melo 1823

Networking

Group Connectivity Model for Industrial Wireless Sensor Networks

J. Lee, T. Kwon, and J. Song 1835

LETTERS

Direct Neural-Network Hardware-Implementation Algorithm

A. Dina, M. N. Cirstea, and S. E. Cirstea 1845
